

Indian Ocean Landscapes is a Perth based landscape design and construction company that offers solutions to suit all lifestyles and budgets. Established in 2009, our landscaping company has worked hard to build a reputation of being known as one of Perth's premier design and landscaping contractors.

Beautiful gardens begin with visionary landscape design. At Indian Ocean Landscapes we design vibrant outdoor living and green spaces for residential, commercial and developer clients with an unmatched eye for detail and quality.

Following design principles driven by quality and sustainability, our landscape designs blend Western Australia's climate and lifestyle with innovative modern garden landscapes, to truly bring your vision to life.

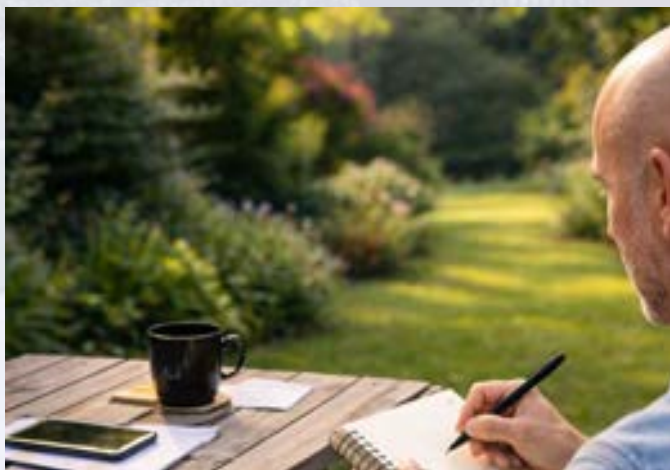

We tailor our landscaping services to suit your project. That means whether you are looking for a complete landscape design, construction and project management service, or just some minor changes or additions, we can help.

Free Written Quotation

If you already have a landscape design, or just require a quotation for smaller works, we will visit your site and provide a free written quotation for the works involved.

For more detailed works that require plans to be drawn up, our landscape design packages are set out on the following pages

LANDSCAPE CONSULTATION AND QUOTATION - \$550.00

We will conduct an on site consultation with you at a convenient time. We will discuss the scope of the project, budget and features of your new garden. This will take approximately 60 mins.

You will be provided with a basic site plan for the works to be completed. We will also provide a detailed quotation outlining the different phases of the project and a breakdown of the costs involved.

At this point we will outline the estimated timeline for the works and a possible start date.

SCOPE

Client Name: _____
Contact Number: _____
Email: _____
Address: _____
Postcode: _____

Project Location: _____
Project Description: _____
Project Start Date: _____
Project End Date: _____

Project Details: _____

10. The client agrees to provide all necessary information for the water features.

11. The client agrees to provide all necessary information for the lighting.

12. The client agrees to provide all necessary information for the structures.

13. The client agrees to provide all necessary information for the other.

2D LANDSCAPE DESIGN - \$1760.00

Our 2D Landscape Design starts with a detailed and scaled site plan. This plan will pull together all elements of the project listed in our scope of works. Placement of landscaping features or trees, as well as locations of control boxes, outdoor lighting, pots or required pre-lays.

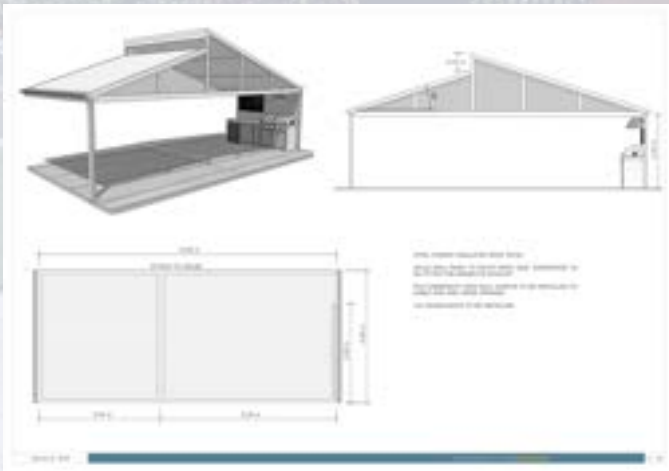

Scaled Layout. This plan is to outline the setout of the site with detailed measurements, heights and notations. The location of any features or structures will be included as well as finished heights for all elements.

Plant and Material Suggestions. Here we outline all trees and plants to be used in your landscaping project. We also visually outlay the material selections for each part of the project. These may be suggestions from our end, or if you know exactly what you are after in your project, your selections will be included here.

DETAILED CONSTRUCTION DESIGN - \$1760.00

Some aspects of your landscaping project will require more detailed design work. Any project that requires Council Approval or aspects to be manufactured off site will require detailed, scaled drawings. This has two benefits - accurate pricing from sub-contractors and confidence in your project gaining Council Approval.

Indian Ocean Landscapes provide Construction Designs backed by years of experience in the industry. Knowledge of both relevant construction techniques, and Local Government R-Codes and by-laws ensure our designs are practical and ready for submission to Council.

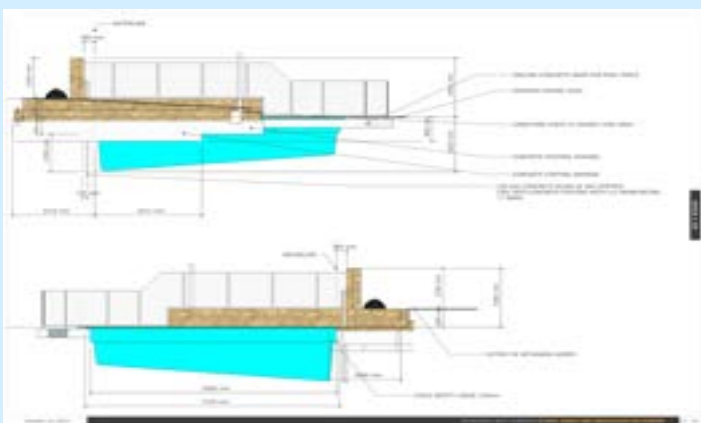

We will provide a quotation with our construction design for the works required. Should you not decide to proceed with Indian Ocean Landscapes as your contractor, the plans are yours to keep. The set of Drawings will be ready for Structural Engineering, Certification and submission to Council when required.

3D RENDERED LANDSCAPE DESIGN

STARTING FROM \$3250.00

3D rendered landscape designs offers a number of advantages over 2D designs, including better visualization, improved communication, and greater flexibility. By incorporating 3D rendered designs into our workflow, we can provide our clients with a more comprehensive and satisfying design experience.

One of the primary advantages of using 3D rendered landscape designs is that they offer better visualization. Using 3D software, we can create a more accurate and realistic representation of the final product. This allows our clients to get a better sense of how their space will look and feel, which can lead to greater satisfaction with the end result.

Another advantage is improved communication. With 3D rendered landscape designs, we can present a comprehensive view of the project to our clients. This makes it easier to discuss changes and make adjustments, leading to a smoother design process and ensuring clients are happy with the final outcome.

Our 3D designs can incorporate all aspects of your project including lighting effects, overshadowing projections from proposed structures or large trees or precise location of critical elements. By designing in three dimensions, we can also move quickly to detailed construction drawings or complete elevation presentation, which can then be used in preparation for any council approvals or submissions if required.

Our 3D design package also include a set of detailed 2D plans,

Design Add-ons available:

- Lighting Plans and Effects
- 3D Animated Fly-Throughs
- Irrigation CAD Drawings
- DA/Planning Approvals
- Certified Building Approvals BA1/BA3
